Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English. Brand new Book. Abstract: This dissertation examines the influence of paramilitary professional cultural attributes on the speed at which disaster response organizations (DROs) recognize, respond, organize, and take action in the immediate aftermath of a disaster. Three agencies are examined: the U.S. Coast Guard, the Federal Emergency Management Agency, and the U.S. military's Southern Command/Joint Task Force-Haiti. The 2010 Haiti earthquake is used as a case study to explore the influence of three independent variables: (1) paramilitarism; (2) career ladders (i.e., recruitment and professional development of staff); and (3) workforce autonomy. The purpose is to determine if paramilitary cultures help or hinder an agency's speed into action, thereby helping improve the disaster response organizations of the future. In the case of Haiti, it finds that the combination of thick paramilitary culture, insider career ladders, and high workforce autonomy best enabled responders' speed into action.
